

## Clearview 6500 Series

The 6500 series is manufactured of high quality extruded PVC material with a wood core frame system, providing an energy efficient patio door which is an ENERGY STAR Qualified product. This door offers a frame design with added rigidity and thermal conductivity than the very reliable 6200 series product line. The unique design with a solid core of pre-fabricated finger joint wood wrapped in an innovative PVC extrusion offers ease of installation, increased strength, and lower conductivity of the colder temperatures. The wood core allows fasteners to be positioned in any location adapting easily to any type of wall construction, whether it would be steel stud, concrete, or your traditional wood framing construction.

## Standard Features

- Wood with vinyl clad frame system offers all the 6200 series features but with additional frame rigidity.
- The vertical stiles are reinforced with aluminum or galvanized steel for added strength.
- Full perimeter double weather-strip reduces water and air infiltration.
- Two tandem Acetal Precision Rollers will provide years of quiet and smooth operation.
- Standard powder coated durable handles, with mortise style locking system.
- Sloped sill to ease water run off.
- Standard height knock down doors are fully reversible, can be assembled to slide left or right.
- Glass is fully tempered and sealed units standard with Low Emissivity Coated glass, Warm Edge Spacer, and Argon Gas.
- Wood frame allows for casing to be easily nailed to door frame.
